

## Solder in Tube

In addition to its convenient pen shape, this coil of solder contains .70 ounces (20g) of either 1.2mm or 1.0mm solder. The 17551 and 17552 feature a chemistry of 60% tin, 40% lead combination ideal for applications like fine electrical soldering which requires lower melting temperatures. The 17551LF and 17552LF feature a chemistry of 99.3% tin and 0.7% copper. This lead-free solder alleviates concerns about the effects of lead on the body and on the environment. Ideal for general purpose soldering including PC board repair and tinning wires.

### Features

- Good solderability, no spattering and non-corrosive
- Ideal for use on PCB, electronic devices and fine electrical soldering
- 1.2mm or 1.0mm sizes available
- Leaded solder 60/40 | Lead-free solder 99.3/0.7

SOLDER IN TUBE	
<b>DIMENSIONS</b>	5.375 x .75 x .75 in
<b>WEIGHT</b>	.70 oz (20g)
<b>SOLDER CHEMISTRY</b>	60/40 & 99.3/0.7
<b>AVAILABLE SIZES</b>	1.0mm & 1.2mm
<b>PACKAGE CONTENTS</b>	Solder in Tube

Part #	Description
<b>17551</b>	<b>Solder in Tube 1.0mm 60/40</b>
<b>17552</b>	<b>Solder in Tube 1.2mm 60/40</b>
<b>17551LF</b>	<b>Solder in Tube 1.0mm Lead Free</b>
<b>17552LF</b>	<b>Solder in Tube 1.2mm Lead Free</b>
